

Information about the speakers

Speaker Professor Ph.D. Zhao-long Wang

Vita The researches of Professor Wang mainly focused on the maintenance and construction of extensive greenroofs, the mechanism of plant tolerance to environmental stresses (drought, heat, heavy metals), centipedegrass breeding for the eco-maintenance turf, and the ecological management techniques for golf courses and sports turf. Professor Wang is executive director at Turfgrass Institute of Shanghai Jiaotong University. He published over 50 research articles in international referred journals and released “civil” centipedegrass for low-maintenance greenroofs and “Fairway” centipedegrass for high quality sports fields. He also serves as the Board of Directors in World Green Infrastructure Network, International Turfgrass Society, Chinese Turfgrass Committee, Chinese Greenroof and Energy Conservation Committee.

Research areas

- Extensive greenroofs
- Centipedegrass breeding
- Turfgrass stress physiology
